EXPERIENCE

GoHealth

Senior Web Engineer May 2013 - Present

I lead teams that deliver products that help consumers to enroll in health insurance either directly or through a licensed agent.

- Turned around low performing SCRUM team through coaching, technical leadership and process improvement.
- Co-Authoring Javascript and AngularJS coding standards complete with pre-commit code analysis and auto-correction.
- Brought application used by over 50,000 licensed agents from business charter to production including developing toolset, service architecture, deployment process and monitoring procedures.
- Helped deliver large, single page Angular application that allows consumers to find and compare health insurance plans.

Perficient Inc.

Senior Technical Consultant Jul 2011 - May 2013

Worked with large enterprise companies developing SOA based middleware enabling communication with internal business units and external trading partners.

- Led task force to improve performance on large scale, batch processing jobs.
- Designed a DataPower powered front-end suite of SOAP WebServices leveraging WS-Addressing, WS-Security.
- Wrote clear, detailed documentation for development and long-term support of enterprise software systems.

- Lead a multi-shore development team in a high profile healthcare project
-

Chicago Agent Magazine

Digital Products Manager Oct 2010 - Jul 2011

Small company covering the real estate industry in Chicago.

- Worked with the Art Director to create seamless brand integration across online and offline channels.
- Developed tools to standardize and simplify common tasks
- Created custom, online formats for special issues of the print magazine.
- Managed a network of over 25 domains and three complex, Wordpress based websites.

EDUCATION

University of Michigan

Sep 2004 - May 2008

Bachelor of Arts - Political Science
